

### **Ordering Archival Prints of Your Memories**

You've gone to all this effort to organize a photoshoot, gotten everyone ready, and made sure everyone was on their best behaviour. Together we made beautiful images, and you shared them on your social media where they got lots of love. But now they've moved down in your feed and soon they'll be replaced completely by the usual blurry phone photos that you're not in. Don't let that be the end of your images! Print out great big canvases and hang them over your couch in a cluster, or along your stairway in a beautiful gallery, or in your bedroom by your vanity to make you smile everyday.

Make an album as well, because you'll hang the highlights, but every little detail is beautiful and I want you to be able to treasure them when JPEGs are impossible to open at some inevitable point in the future. An album is a cherished family heirloom that you can pass on to your kids and they can show to your one-day grandbabies.

Don't forget that your moms also want copies so they can show off their own beautiful grandkids! You can order prints through your gallery, but here's all the special stuff that I can make for you

### **Photobooks & Albums**

Choose your favourite images from your gallery using the favourite button and let me know and I'll send over a proof album for you to look at and decide if you're interested. Just let me know what size album you're looking at!
